The Munich Center for Mathematical Philosophy has laid the cloth. You are invited to join us for the

Round Table on Acceptance

February 3rd, 2012 – Ludwigstraße 31, Room 225

The Bayesianist concept of belief is described by a measure-theoretic and thus quantitative approach to probabilities as changeable degrees of belief, whereas classical epistemology views belief/acceptance as a qualitative notion.

Questions arise from this contrast: How can the two concepts be related? Which bridge principles can be drawn on to accomplish this task?

This public MCMP event is to bring the philosophical theories of Leitgeb and Kelly/Lin to one table.

14:00h Coffee Table

14:30h Table of Contents

> Key presentations on formal theories of acceptance and their application: Kevin Kelly and Hanti Lin (Center for Formal Epistemology/CMU Pittsburgh), Hannes Leitgeb (LMU/MCMP)
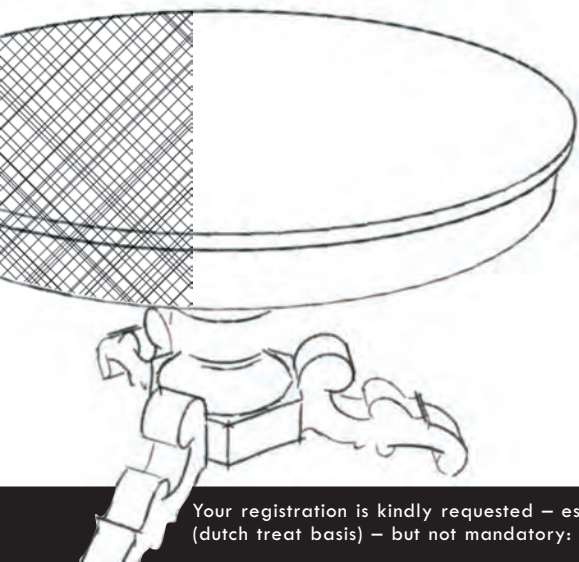

16:15h Refreshment Table

16:30h Truth Table

> Kevin Kelly, Hannes Leitgeb, Hanti Lin: Working discussion on philosophical theories of acceptance, belief revision, and formal/conceptual common grounds

18:30h Banquet Table

> DELI Café Lounge Bar, Brienner Str. 7
